Subject: New Lights at Connolly Center

To all involved:

I would like to express my personal appreciation in regards to the new lights in Connolly. The positive feedback from users and coaches is phenomenal. Our Intramural programs will probably benefit the most from the new lighting because of the many students involved and the late night programs we offer. For the 7 years I've been here, this is probably the biggest positive change I've been involved with.

The crew at Northwest Edison did a great job with working around our availability. We didn't have to reschedule any programs or close any parts of the gym earlier to accommodate them. They were very easy and great to work with. It is amazing how fast they got things done and their willingness to add that extra light in the corner of the North Court was greatly appreciated.

The Men's Basketball Coach was more happy with the additional light in the main entrance than in the whole gym being lit up. The Swim Coach, who has been asking for more light the past 5 years, has gotten positive feedback from swimmers and the swim team.

Thanks again for lighting up our building and ridding us of the loud buzzing noise (from those old lights) in the gym.
